

BRAWO® SYSTEMS

April 2024

BRAWO® Magnavity SX is honored as the most innovative product by the North American Society for Trenchless Technology (NASTT)

The smart light curing system BRAWO® Magnavity SX won the Abbott Award from the North American Society for Trenchless Technology (NASTT).

The award was presented at the No-Dig Show in Rhode Island, USA. In the categories of innovation, value, competitive position and impact, the efficient light curing system from BRAWO® SYSTEMS was entirely convincing.

Andrew Marshall, Sales Manager BRAWO® SYSTEMS, accepted the award. He is certain: "The technology of the BRAWO® Magnavity SX offers enormous advantages in the field of trenchless pipe rehabilitation."

BRAWO® SYSTEMS is a system provider for the rehabilitation of building and property drainage pipes. In addition to the well-known BRAWOLINER®, machines such as the BRAWO® Magnavity SX are also developed and sold worldwide under the BRAWO® Tech brand.

BRAWO® Magnavity **sx**

smart • efficient • strong

A selection of the advantages of the BRAWO® Magnavity SX::

- Intelligent LED heads with integrated magnetic coupling for electromagnetic remote unlocking
- 96 / 192 high-power UV LEDs with extremely high efficiency
- Saves a complete operation
- Very fast curing
- Very good bend flexibility, 87° possible from 4" (DN 100)
