

CLEANING BRUSHES

Gentle But Effective Cleaning in Plastic & Fragile Pipes

Picote offers both plastic and metal cleaning brush options. Both are good for cleaning in plastic and fragile host pipes.

The plastic cleaning brushes are extremely gentle on the host pipe but are excellent at cleaning soft blockages due to the unique high-speed capability of Picote Millers. They are available for DN32-300, or 1¼ to 12" pipes.

Wire cleaning brushes are available for DN50-300, or 2 to 12" pipes, and are designed for removing fine dust or light mineral deposits.

USES, BENEFITS, PRODUCTS AND PARTS

- Plastic cleaning brushes are very gentle on the host pipe and effective at clearing soft blockages in plastic and fragile pipes
- Plastic cleaning brushes are also used for applying Picote Brush Coating™ resins.
- Wire cleaning brushes are designed to remove light mineral deposits and fine dust in cast iron pipes prior to coating.
